

CRM Starter Pack for the Telecoms Industry

The CRM Starter Pack for the Telecoms Industry is a unique CRM solution designed by Three Grey Monkeys to meet the growing demands for a quicker, simpler and cheaper CRM system for the Telecoms industry.

In working with our long-standing Telecoms clients we found that there were many synergies in the features of a CRM system that were needed but to implement a fully-fledged and company customised CRM system was not only time-consuming but also very expensive for our clients.

The CRM Starter pack gives you an instant pre-configured CRM system for Telecoms companies' use which is delivered via a simple zip file so you are up and running with a CRM system as quickly and painlessly as possible.

Features include:

Customise Lead Form with incumbent services, credit check and creation of stakeholder fields. Data is automatically populated to the Customised Account Form and Contact when a Lead is qualified. This is more business efficient as it saves time on manual data entry.

What Are The Benefits?

- Provides a tangible Telecoms company specific CRM system.
- Cheaper and faster to embed in the business than a company customised standard CRM package.
- Simple and easy to use.
- Relevant Telecoms specific data enables your customers to be provided with the right service at the right time.

Additional Information

The CRM Starter Pack is designed to work in tandem with Union Street's Ability Synchroniser and Three Grey Monkeys' Email to Case.
